Curriculum INTENT

At William Lilley we support individuals to achieve through their love of learning. Children are good communicators and build strong relationships within the school family and community. Their individuality is recognised and we nurture each child's academic, social and emotional needs. Each child's learning journey carefully builds on previously acquired skills and knowledge to ensure secure improvement. Children are enthusiastic, inquisitive and aspirational, showing the determination and perseverance they need to be successful in all that they do.

Rationale

This curriculum intent was created in May 2019 in collaboration with staff and governors.

Consideration was given to gaps in learning and specific needs of children within the William Lilley community and from this 'Personalised Learning Needs' were compiled. These form the basis of our Curriculum at William Lilley alongside the National curriculum and year group essential knowledge and skills. These also guarantee a direct link to our school vision statement. These were combined to create seven 'Curriculum Drivers'.

In order to make sure that these are embedded across our curriculum, curriculum leader roles were revised to link directly to the seven Curriculum drivers; ensuring effective monitoring and development within each subject. The seven curriculum drivers and overarching aims for each driver are as follows;

Wider world pioneers - Exploring through first hand experiences of the outdoors and wider world

Communication Heroes - Effectively communicating with others

Wellbeing Guides - Supporting the 'whole child'

Community Leaders - Ensuring our parents and local community are fully engaged with William Lilley

Uniqueness Champions - Celebrating individuality and promoting tolerance and acceptance

Learning Philosophers - Promoting positive learning behaviours

Forward Thinkers - Following our interests and preparing ourselves for a successful future

The seven curriculum drivers have been carefully selected to provide an ambitious and challenging curriculum for all, allowing all pupils, especially disadvantaged and SEND to gain/learn the knowledge and skills to succeed in life, beyond William Lilley.

The curriculum has been organised through a two-year plan in Key Stage One, allowing opportunity for children to revisit previous learning and objectives at their developmental level. The two year plan highlights the full breadth of the National Curriculum alongside knowledge and understanding for each year group. This ensures children apply their new knowledge fluently and independently; working towards sustained mastery. From this, our medium term plans directly relate to the curriculum intent through the seven curriculum drivers which ensure the needs of children who attend William Lilley are fully considered within each topic. At the end of the two years, children will have cumulatively gained sufficient knowledge and skills for future learning in Key Stage Two.

Children have access to a knowledge mat for each new topic. These knowledge mats are created after the formation of the medium term plan for the topic and are shared with parents and children. This conscious strategy ensures optimum learning potential providing the children with rich knowledge so that when learning is revisited - they have 'hooks' for new learning to take place. This generative knowledge will be made from a combination of curriculum knowledge and interesting facts.

William Lilley Seven Curriculum Drivers:

William Lilley Seven Curriculum Drivers Overview:

The seven curriculum drivers were created in line with the National curriculum, other areas of importance, William Lilley vision and personalised learning needs.
